

Threaded fitting NPFC

FESTO

Threaded fitting NPFC

Characteristics

At a glance

- Nickel-plated brass
- Operating medium: compressed air, vacuum

Note:
When using R threaded studs, we recommend sealing with thread sealing tape GWB-0.1 (part no. 9076). When using M and G threaded studs, an additional axial sealing ring is required (preferably soft aluminium AL 99.5).
The threaded fittings NPFC are treated as mass-produced goods and sold in bulk. Surface defects or markings cannot be excluded. This may require G threads to be sealed as well.
