

Slide Projection

Slides are fascinating event and memory storage devices of particular quality. Traditional slide projection means: the picture of the slide can be seen (strongly enlarged) on a screen. The strong light source, the projector

lens and the quality of the screen influence the contrast range, the brightness of colours and finest colour graduations of a picture.

Projection area: 125 x 125 cm; Projection diagonal: 177 cm	018790	Qty 1	CB
Projection area: 155 x 155 cm; Projection diagonal: 219 cm	018793	Qty 1	CB
Projection area: 180 x 180 cm; Projection diagonal: 255 cm	018796	Qty 1	CB

Tripod Projection Screen
