## RS PRO Defence Standard 61-12 Part 5 16-2-4A Black 25m

Stock No: 201-2212

Description: 4 core 0.5mm<sup>2</sup> unscreened PVC insulated and sheathed industrial cable.

Applicable Standard: Defence Standard 61-12 Part 5.

Conductor: 16/0.2mm tinned copper (nominal construction).

Insulation: PVC, 0.45mm nominal thickness to 1.83mm nominal diameter.

Core colours: Red, Blue, Green, Yellow.

Lay-up: Cores twisted together with overall polyester tape.

Sheath: PVC, 0.90m nominal thickness to 6.3mm nominal diameter.

Voltage Rating: 440V at frequencies up to 1.6KHz.

Conductor Resistance:  $40.1\Omega$ /km max at  $20^{\circ}$ C.

Insulation Resistance: 11MΩ.km min at 20°C.

Temp range: -15°C to +85°C.

Current Rating: Current carrying capacities for multi-core cables are not given owing to

the varied conditions of loading and construction. However, for guidance,

where a single core of a multi-core cable is loaded, the current in a

16/0.2mm conductor should not exceed 2.5 Amps.
