

TECHNICAL DATA SHEET

RS 180-819 Solvent Cleaner

RS 180-819 is a fast-drying solvent cleaner. It has been formulated to exhibit excellent solvency properties and is suitable for many electrical applications. It quickly and efficiently removes flux residues after soldering. It can replace ozone depleting solvents such as CFC 113 and exhibits rapid cleaning and fast evaporation rates.

- 100% ozone friendly solvent – i.e. zero ODP.
- Excellent removal of greases, oils and flux residues and acrylic conformal coatings from printed circuit boards (PCB's) and other electro-mechanical assemblies.
- Leaves a perfectly clean, dry surface - conventional solvents often leave greasy deposits which attract dust and dirt.
- Harmless to most plastics, rubbers, elastomers and surface coatings.

Typical Properties

Specific Gravity @ 20°C (g/ml):	0.79
Residue on Evaporation:	<1ppm
Evaporation Rate:	16 (with ether as 1)

Packaging

500 ml Bulk

Order Code

RS 180-819

Product Use

RS 180-819 contains flammable solvents and should not be applied onto live electrical equipment or other sources of ignition. Apply to surface that requires cleaning, rinse with fresh solvent and allow to evaporate. A brush or foam tipped bud may be used to remove any stubborn deposits.
