

ET300K1BLCM

Electro-hydraulic crimping tools

The new crimping solution Blue Advanced is designed to crimp pre-insulated lugs from 0.34 mm² to 6 mm² according to NFF 00-363.

The remote electro-hydraulic unit, powered by a MAKITA 18V/5.0 Ah battery, is connected to the crimping hand tool by a 3 m cable. This configuration reduces the weight of the crimping device for better handling.
