The CPI-CTU series cable extension transducer is available in 4 stroke lengths ranging from 120mm – 1270 mm. With the enclosure being manufactured from Nylon 66 and utilising a proprietary blend of reinforcing fibres, in conjunction with the bespoke draw wire cable for improved tensile strength -   this provides an overall rugged construction suitable for a variety of harsh and demanding environments.

The CTU size envelope allows it to be fitted into small spaces, with a permissible misalignment and ships with; a stainless steel mounting bracket, x2 T-Nuts - to give the user as many mounting orientations /options as possible as standard.

Bespoke mounting solutions can also be accounted for.
