High Performance Miniature Circular Connectors

HR12 Series

Features

•Snap lock allows for easy insertion and extraction and prevents the accidental un-mating of the connector due to vibration or impact.

•The plug diameter range from ϕ 12mm to ϕ 16mm, and satisfies the need for small-size, light-weight and high-density electronic components.

•Equipped with internal metal parts and a shielding mechanism, the HR12 (20-contacts) and HR212 feature enhanced protection against EMI.

(Note)

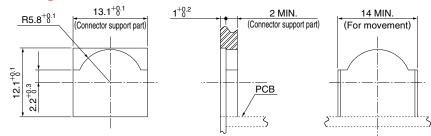

This product should be mounted on the panel to hold with the interface portion, as shown in the panel mounting hole dimension diagram.

When it is difficult to press the connector into the panel, we recommend using the attached stopper plate HR12-10R-SP(71) (112-0507-0 71) as described on page 7.
