

Features

- ESD – Designed to safely discharge static electricity and protect electronic components from electrostatic discharge events.
- Full Metal Construction
- Available in different sizes

RS PRO ESD Middle Vertical Upright

RS Stock No.: 0687827

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

MIDDLE VERTICAL UPRIGHT is a center-mounted upright designed for modular ESD workbenches. It serves as an essential structural component that allows the installation of accessories on half the width of the workstation, enabling flexible configuration of the workspace with various types of equipment.

The upright is made of durable structural steel with a thickness of 2 mm, ensuring high stability and load resistance. With a height of 1800 mm and width of 40 mm, it is fully compatible with workbenches in lengths of 1200, 1500, 1800, and 2000 mm.

The surface is coated with a durable powder finish in RAL 7035 (light grey). Additionally, thanks to ESD protection, the upright is suitable for use in environments sensitive to electrostatic discharge, ensuring the safety of electronic components and the user.

Accessories compatible with L & H Type workbenches
