## SELF-IGNITING NIGHT LIGHT LED LUM-3252

### Specifications :

New led night light to be plugged directly on a 230V installation. The light turns on automatically when somebody walks by thanks to its built-in motion sensor. Its led technology provides a light with a power of 60 lumens and a reduced consumption of 2.8W.

With its elegant design the night light finds its place in any room in the house.

Convenient in the day-to-day use, this night light delivers security lighting in a hall, a room or around the stairs.

This night light has a very elegant aluminum finish.

### Features :

- Power: 60 lumens
- Electric consumption: 2.8W
