RS Pro PVC, Strain Relief Cable Gland, 5mm Bundle Diameter

Product Details

Strain Relief Gland

The Miniflex FBLT Strain Relief Gland enables ruggedised patch cords, or fibre bundles, protected in Fibre Bend Limiting Tube (FBLT) to be anchored to a chassis, or distribution trunking system, by the simple provision of a single hole. The FBLT is passed through the gland and is secured by the integral Tube Gripper Clip, this ensures a pull out resistance of over 100N whilst still ensuring a 30mm radius bend control and crush protection.

Material: PVC

Mid point or end termination of FBLT

Neat and unobtrusive

Provides secure fixing
