

## FEATURES

- Full-type 2BA lock nuts
- Small hex heads
- Nickel-plating on brass offers good resistance to tarnishing, corrosion and rust
- Hexagonal shape
- Securely fits with all standard types of threaded rods

## RS PRO, 2BA, Nickel Plated Brass Full Lock Nut

RS Stock No.: 483-0574

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

## Product Description

Need small-size lock nuts for model engineering applications? These 2BA lock nuts mate with small BS 57 standard hex-headed bolts that make scaled fastenings easier to represent. The lock nuts are also widely used in miniature instrumentation as they are viable for applications with space constraints.

Made from brass, these full lock nuts are nickel-plated to ensure good resistance to tarnishing, corrosion and rust. The hexagonal shape allows you to tighten them using a standard spanner. As part of the RS PRO range, this product undergoes rigorous testing for quality and durability. The lock nuts meet a range of international standards including protection against damage from electrostatic discharge (ANSI/ESD S20.20:2014 and BS EN 61340-5-1:2007).

## General Specifications

<b>Thread Size</b>	2BA
<b>Type</b>	Full
<b>Material</b>	Brass
<b>Finish</b>	Nickel Plated
<b>Applications</b>	General mechanical, railroad and industrial settings

## Mechanical Specifications

<b>Specification</b>	BS 57
<b>Thread Pitch</b>	31.4

## Approvals

<b>Compliance/Certifications</b>	RoHS (restriction of hazardous substances) standards, ANSI/ESD S20.20:2014 and BS EN 61340-5-1:2007
