## Exit Routes & Route Guides

There are two basic types of emergency lighting luminaires - maintained and non-maintained. Maintained, These luminaires are switched between the maintained function (lamp illuminated at all times) and non-maintained (lamp off until such as corridors, workshops and permanently illuminated emergency exit signs. The maintained luminaires are only illuminated on a failure of the mains supply. Ideal for e{ ^i\*^} & ^cã Ê, ã&@ [ [ { • Á q | æ ^ Á ^ æ Æ
