Keysight Remote Link

Reach MORE. Accomplish MORE. Expect MORE.
Introduction

The Remote Link solution — Keysight’s next generation wireless connectivity solution lets you measure further, easier and faster. Transform your Keysight handheld meters into a wireless remote measurement solution by simply plugging in the U1177A/U1117A IR-to-Bluetooth® adapter. This allows users to safely measure, view and log test measurements with an extended range of up to 100 meters away with U1115A remote logging display. Users can log and monitor data on more display devices such as Windows PCs or iOS/Android-based smart devices.

— Perform remote measurement and data logging wirelessly
— Easily set-up with wide choices of Keysight U1200 Series handheld meters and Keysight U1450/U1460 Series insulation resistance meters¹
— Compatible in multiple platforms² (Windows PC, Apple iOS, Andriod)

Notes:
1. Refer to Table 1 for Keysight handheld meters compatibility
2. Refer to Table 3 for Remote Link application and software compatibility
Improve work safety with 10 times MORE distance

On site testing in large industrial site can be challenging and hazardous when dealing with live machineries or high voltage equipment. By connecting your handheld meter with U1117A IR-to-Bluetooth adapter and U1115A remote logging display, you can view and log measurements wirelessly up to 100 meters away. Get more wireless measurement distance to diagnose and evaluate live machinery from afar without having to be physically present – ensuring your safety and comfort level.

Compatible with MORE handholds

The Remote Link is able to communicate via Bluetooth to 20 Keysight U1200 Series handheld meters, including the new U1450/ U1460A Series insulation resistance testers. Now you can save investment cost by using existing Keysight handheld meters that you have already owned. The wide selection of handheld meters cater to various application needs to get real-time measurements from a basic, compact and low cost handheld meters.

![Figure 1. Communicate via Bluetooth to all existing Keysight U1200 series handheld meters, including the U1450A/U1460A series insulation resistance testers](image)

Note:
1. Refer to Table 1 for handheld meter models that are compatible with U1177A/U1117A IR-to-Bluetooth adapter and U1115A remote logging display.

Support MORE display devices

The Remote Link solution offers versatility to work with more display devices. Now you can log and display measurement readings either on the U1115A remote logging display, iOS and Android smart devices or on a Windows PC. With the wide supportability range, it allows you to multi-task by being able to measure various test points at the same time.

U1115A remote logging display

**Figure 8.** Monitor up to four handheld meters readings at once with the U1115A remote logging display

*All images shown are for illustration purposes only*
**Keysight Mobile Meter Application (iOS/Android)**

Monitor up to three multimeter measurements at the same time with Keysight Mobile Meter.

![Keysight Mobile Meter Application](image)

**Keysight Mobile Logger Application (iOS/Android)**

Perform data logging up to three multimeters – wirelessly and simultaneously!

![Keysight Mobile Logger Application](image)

**Keysight Mobile Meter** is a free iOS or Android application software that allows iOS or Android based smart devices to connect, control and perform up to three handheld meter measurements.

- Log and monitor up to three measurements simultaneously without the need to be physically present
- Make measurements from a safe distance
- Eliminates the need to walk back and forth between measurement points
- Save money, time and achieve higher work productivity

**Keysight Mobile Logger** is the free iOS or Android application software that logs data and provides trending graphs from Keysight handheld meters.

- Capture data streams or plot trending graphs
- Used for analysis to identify intermittent behavior or detect drifts
- Email functions, Short Message Service (SMS), pan and zoom function via iOS/Android device’s touch screen
- Create mathematical functions and plot trending graphs

---

Keysight Insulation Tester Application (iOS/Android)

Perform remote testing, data logging and report generation with Keysight Insulation Tester Application

![iOS](image1.png) ![Android](image2.png)

Figure 11. Remote testing and report generation interface on the Keysight Insulation Tester Application

Keysight Insulation Tester Application is the free iOS or Android application software for the new U1450A/U1460A series insulation resistance testers to perform remote testing, data logging and generate test report via a smart phone or tablet.

- Acquire and analyze insulation resistance data from a distance
- Eliminates manual data entry errors for report generation
- Fastest way to generate accurate test reports
- Log data and provide trending graphs to identify intermittent problems (multimeter functionality)
- Saves money, time and achieve higher work productivity

Keysight Handheld Meter Logger software for Windows PC

The Remote Link solution also supports data logging and monitoring activities on a Windows PC via downloadable Keysight Handheld Meter Logger software.

![Windows PC](image3.png)

Figure 12. Data logging interface on the Keysight Insulation Tester Application

The Keysight Handheld Meter Logger software is a free software compatible with the U1210 Series, U1230 Series, U1240 Series*, U1250 Series, U1270 Series, and U1450A/U1460A**.

- Connect up to 10 handheld meters – 5x IR-to-Bluetooth Adapter (U1177A, U1117A) and 5x IR-USB Cable (U1173B)
- Meter view (live measurements) and Logger view (graph with zoom and pan) mode
- Manage multi-session data logging within the software and export the data to other software (Excel)

* For the U1240 Series, you also need to purchase the U1179A IR Connectivity Bracket to enable IR connectivity

** Only allows one connection at a time
