Laser Black Hiker Boot

These DeWALT laser safety boots have a 200 joule steel toe cap to protect your feet in hazardous environments but are also designed for comfort. The mesh and leather upper ensures they remain lightweight and flexible giving you less foot fatigue, maximum comfort and extreme durability. The padded collar and tongue as well as the cushioning insole ensure these laser safety boots are comfortable to wear and also have an anti-bacterial comfort inner sole with dual density seat region for shock absorption. The mesh allows air to get to your feet making them breathable so you can keep them on for longer periods of time making them more productive.

These DeWALT laser safety work boots have a steel mid sole for under foot protection and are available in UK sizes 6 to 12.
