

SMC18-60AT

Cable Semi-Con Shaving Tool

The SMC18-60AT quickly and easily removes bonded semi-con from 5 to 35 kV power cables. Its unique blade shape preserves the smooth surface on insulation, eliminating the need for deburring or additional surface finishing. Its optimal stability design securely supports cables with diameters from 18 mm to 60 mm throughout the shaving operation.

Features

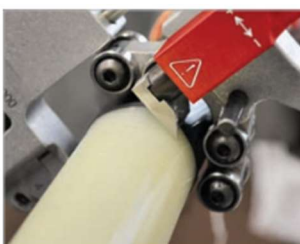

- Compact design accurately removes semi-con within 30 mm of the jacket on mid-span & end stripping applications
- Precision blade depth adjusts in increments of 0.1 mm
- Adjusts for 18 mm to 60 mm cable diameters with semi-con thicknesses up to 2.4 mm
- A revolving ergonomic handle & accessible adjustment knobs reduce effort & potential strain from repetitive shaving functions
- Stop position squares off the edge to complete the shaving operation without the need for an additional clamp
- Blade is easily replaced
- Weight: 685 g Dimensions: 133,2 X 76,6 X 128,5 mm.

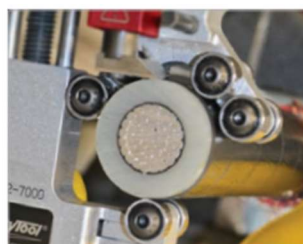

CABLE VOLTAGE	CABLE DIAMETER	SEMI-CON THICKNESS	CHAMFER ANGLE	REPLACEMENT BLADE PART
5 kV to 35 kV	18 to 60 mm	Up to 2.4 mm	12°	SMC18-60ATB

Ref. for tool with plastic case: **SMC18-60KC**

Unique blade shape leaves surface of insulation extremely smooth.

Extra rollers provide tool stability on a range of cable sizes.

Winding pin keeps semi-con strip from getting in the way.

Equipped with four speed positions to optimize performance.
