Notes on Contact Gaps except Welded Contacts
Example: RF1V-2A2B-D24

- If the NO contact (7-8 or 9-10) welds, the NC contact (3-4 or $5-6)$ remains open even when the relay coil is de-energized, maintaining a gap of 0.5 mm . The remaining unwelded NO contact (9-10 or 7-8) is either open or closed.
- If the NC contact (3-4 or 5-6) welds, the NO contact (7-8 or $9-10)$ remains open even when the relay coil is energized, maintaining a gap of 0.5 mm . The remaining unwelded NC contact (5-6 or 3-4) is either open or closed.
