RS Pro Black Nylon Rod, 1000mm x 36mm Diameter

Product Details

Nylon 6

Black extruded Nylon 6 containing MoS₂

Good sliding and dry running properties

Resistant to oils, grease, petrol etc.

Easily welded, bonded, machined and polished

UV and weather resistant

Suitable for friction bearings/strips, gears, castors, pulleys, chains, wheels and machine parts etc

Black in colour

Tolerance thickness sheets: +0.2 mm → +0.9 mm

Max. Service Temp. (Long Term)	+100°C
Elongation	40%
Tensile Strength	60-85 MPa
Hardness (Rockwell-Shore D)	M88 (Rockwell)
Flammability Rating	UL 94 HB
Water Absorption	8-9% at saturation

Note

This material is not electrically insulating

Natural & Cast Nylon

These materials have good chemical, abrasion and UV resistance, are easy to machine and possess good selflubricating qualities. They are resistant to hot water and can be welded.

Specifications

Colour	Black
Length	1000mm
Material	Nylon
Form	Rod
Rod Diameter	36mm
Density	1.14g/cm³
Tensile Strength	75 MPa
Flammability Rating	UL 94 HB
Water Absorption	8 to 9%
Maximum Operating Temperature	+160°C
Elongation	25%
