

SPECIFIC HAND TRUCKS

250 KG

Depalletising trolleys

Range designed to palletise or depalletise a load effortlessly by leaving the hand truck on the ground without the need to lift or lower the hand truck from the pallet.

- Operation: the tilt of the hand truck causes the flap to slide on the deck tubes.
This sliding system makes it possible to effortlessly accompany the placing or removal of a load on a pallet.
The wheels remain on the ground during the entire handling process.
- Equipped with approach wheels to position the hand truck effortlessly close to the load.
- Closed handles to allow the position of the hands to be adapted as the product is handled.
- High chassis to handle bulky loads.
- Mechanically welded structure in \varnothing 25 mm tube.
- Delivered assembled.
