Compact, non-pluggable lightning current/surge arrester free of leakage current based on wear-free carbon spark gap technology for 1-phase power supply networks with separate N and PE (3-conductor system: L1, N, PE), suitable for use in the unmetered area, discharge capacity of up to 100 kA for lightning protection levels I and II, with remote signaling.

Your advantages

- Safe operation and maximum system availability, thanks to reliable protection in the event of lightning current and surge voltages using innovative high-performance spark gap technology
- Maximum performance in the smallest installation space for all common power supply systems
- Suitable for use in the unmetered area, thanks to a protective circuit free of leakage current, and to a mechanical visual status indicator
- Space-saving and inexpensive installation, thanks to the slim overall width
- Informed at all times about the function of the protective effect, thanks to clear green/red indicator and optional remote indication contact
