Silicon Rubber Heater, 10" x 5", 250 W

Product Overview

Silicon rubber heater mats provide outstanding performance in applications up to 250°C under various operating conditions. When properly applied, silicone rubber heater life routinely exceeds 10 years. Design versatility permits special heat profiles allowing zones of higher or lower heat concentration as needed. The heater mats flexible construction makes them very easy to install on a variety of surfaces.

Product Details

- Mounting on flat or curved surfaces
- Not affected by vibration, flexing or repeated mechanical shock
- High dielectric strength, non-toxic and flame retardant

English

RS Article	Width (in)	Length (in)	Wattage (W)	Voltage (V ac)

Specifications

Width:	5 in
Length:	10 in
Voltage:	230 V ac
Wattage:	250 W
Lead Wires:	10 in
Lead Wire Insulation:	Teflon
