DESCRIPTION

RUBBER INSULATING GLOVE

UTILISATION Composite insulating gloves for working in complete safety without leather over-gloves. Maintenance operations with a high mechanical risk. CHARACTERISTICS Natural rubber gloves with an red-orange elastomer outer layer, black interior, sliced edges. The materials used give these gloves a great degree of flexibility despite the thickness required to guarantee real protection against mechanical risks. To attenuate the effects of transpiration, each pair of gloves is sold with a pair of under-gloves. Separate from the gloves, the under-gloves can be replaced regularly thus limiting any bacteriological problems related to residual dampness owing to transpiration.

SPECIFIC DATA

Designation	RUBBER INSULATING GLOVE T10
Sales reference	Z-426-C10

SAM Outillage

10 rue Camille de RochetaillÃ©e
