## Description of New Products

**NOTE – This is an updated version of the original PRN# 11A-2025 to add the two associated Development Kits (DKs), no other changes.**

Built on Infineon’s AIROC™ CYW55310, the Vela IF310 brings together Bluetooth Classic (BR/EDR) and the full Bluetooth 6.0 LE feature set—including LE Audio with LC3, Isochronous Channels, Auracast, LE Coded & 2 MPHY and Advertising Extensions—so you can refresh legacy Classic designs and embrace the latest LE Audio opportunities with one module.

A 192 MHz ARM® Cortex-M33, integrated audio interfaces, up to +10 dBm output power and a very flexible HCI UART interface for a variety of hosted / hostless SW architecture options deliver a low-risk, fast time to market platform for demanding medical or industrial audio and data applications.
