

FEATURES

- **Sintered Bronze Material:** Offers excellent wear resistance and durability, ensuring a long service life.
- **Compact Design:** With an outside diameter of 0.43 inches, it fits easily into tight spaces, making it versatile for different setups.
- **Optimised Shaft Diameter:** Designed for a 0.31-inch shaft, providing a precise fit and reducing vibration.
- **Low Friction:** Minimises energy loss and enhances efficiency in mechanical systems.
- **Self-Lubricating:** Reduces the need for frequent maintenance and lubrication, saving time and costs.

RS PRO Sintered Bronze Plain Bearing, 0.31 in Shaft Diameter

RS Stock No: 528-070

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This RS PRO sintered bronze plain bearing is designed to provide reliable and efficient performance in various industrial applications. With its robust construction, it ensures smooth operation and reduces friction between moving parts, making it ideal for machinery and equipment that require consistent and low-maintenance operation.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	0.31 in

Mechanical Specifications

Length	1 in
Material	Sintered Bronze
Outside Diameter	0.43 in
