## RS PRO Steel Padlockable Zinc Door Bolt, 215 mm

RS Stock No: 751-247

RS PRO is the own brand of RS. The RS PRO Seal of Approval is your assurance of professional quality, a guarantee that every part is rigorously tested, inspected, and audited against demanding standards. Making RS PRO the Smart Choice for our customers.

## Product Description

RS PRO heavy-duty spring-loaded bolts ideal for doors and gates. These door bolts remain in locked position until intentionally released. These steel bolts have a zinc plated finish and a shoot diameter 1/2 inch (13 mm). These door bolts are supplied complete with a staple plate.

Door bolts are the bracket-secured bolts that slide across doors to reinforce locks and provide additional security measures. They are commonly found in many domestic and commercial environments.

Sliding bolts have a catch which they slide into, which can be mounted to the frame to secure access. Sliding bolts are fixed by screws, offering an easy installation option with minimal damage to the material underneath. These bolts are padlockable for extra security.

RS PRO have a great range of bolts made from materials such as steel, aluminium and brass and include various finishing's like black epoxy, BZP, chrome plated and galvanised.
