**Article description**

- Using the GEDORE ball bearing extractor, the removal of shaft-mounted ball bearings in a housing is now possible without any problems
- The design allows a PLUS in effectiveness and productivity through a maximum of functionality in combination with simplified handling
- This tool is easy to use: The legs are fixed in the slot
- The self-locking arrangement means that the force applied is 100 % utilised
- Secure at all times against slipping off - and a straight pulling force for precise working
- 1.92/1 for bearings: 6000-6010, 6200-6205, 6300-6304
