ELECTRONIC SCREWDRIVER

i 2C-T-Handle

Asymmetrical 2-component wing handle for high torque level when loosening or tightening. The lengthened wing provides an optimum contact surface for the palm of one's hand. It thus easily transfers considerable forces in a relaxed hand's position.

With T-shaped cross-section: broad at the top and slender below. In this way one's hand takes on a firm grip leading to vigorous working over an extended period without any fatigue.

The concave form ensures exact hand centering and stops any blade tilting.

Soft zones where sensitive hand zones grip e.g. finger tips. Hard zones where robust hand zones grip.
