Folded length	10.8 cm
Folded width	35.5 cm
Embossing	No
Print	No

The low-lint Tork Polishing Cloth is ideal for polishing sensitive surfaces. The soft and flexible cloth releases polishing agents for a professional shine without leaving any traces. This cloth can be used in the Tork Folded Wiper/Cloth Dispenser that protects the refills from dirt and offers one-at-a-time dispensing to reduce consumption and waste.

Key benefits:

- Professional quality cloth that leaves no scratches
- Perfect for working with sensitive surfaces due to extreme low-lint properties

Environmental

Tork Polishing Cloth

Viscose
Polyester

Viscose

Viscose fibres are produced from cellulose pulp. Cellulose is dissolved in alkaline solution by a chemical reaction with carbon disulphide and then spun to fibres in an acid spinning bath. The fibres are washed, dried and cut to intended fibre length.

Polyester

Polyester fibre is produced from terephthalic acid and ethylene glycol, which react through condensation to polyester resin. The molten resin is spun to fibres through spinnerets and cooled with air. The fibers are then cut to intended fiber length.

This product does not contain any silicone.

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
