## Technical data

### Notes

Assembly note	<b>NOTE:</b> Observe the permissible bending radii when routing cables, since the degree of protection may be at risk if the bending forces are too high. Reduce mechanical loads upstream of the connector, e.g., by using cable ties.
General	The user must take appropriate safety precautions so that the connector cannot be accidentally loosened or opened. To protect against unintentional opening of the connector, the thread must be secured between the housing and the connector head using a suitable cyanoacrylate adhesive.
