RS Pro Steel Grey Modular Shelving Shelf Set x 300mm

Product Details

Shelf Kits

Standard shelves supplied in packs of two complete with fittings to clip into the above bays., Manufactured from 20 gauge sheet steel in depths to suit either 300, 500 or 600mm deep bays and finished in grey stove enamel. Loading 135kg evenly distributed load.

Modular Shelf System

The storage rack system is modular in concept and consists of a fully integrated range of bolt free adjustable steel shelving, with a wide range of accessories for small part storage. With such flexibility a wide range of layouts may be created. It is quick, easy and simple to erect or modify, as it does not require time consuming nut and bolt assembly. All the major components are manufactured from high tensile steel with a two tone light and dark blue epoxy coated paint finish.

Features:

- Simple to assemble
- Easy to make suitable for static safe handling
- Each bay suitable for 945kg weight loading
- Security pack available for high value items
- High density storage available using polypropylene small parts bins
- Meets the latest SEMA codes for racking
- May be added to existing modular RS rack systems
