
TVAC40110

10 m preassembled video combination cable

Save time on installation! This ready-made video combination cable is a new, extremely handy accessory for the Eyseo cameras. It provides transmission of the video signal and enables the power supply – at the same time. The video signal and power supply are not only combined in one cable – the cable is also preassembled ready for use: save yourself the hassle of stripping, connecting and crimping.

The video combination cable is available in a length of 30 m (TVAC40130), 20 m (TVAC40120) and 10 m (TVAC40110).

Product highlights:

- Video signal und power supply combined in one cable
 - Ready-made BNC and DC connections
 - Suitable for all cameras with BNC jack (female) and voltage connection (male)
 - 10m cable length
-

TVAC40110

10 m preassembled video combination cable
