

PCAN-Diag FD Charging Station

Stand for the PCAN-Diag FD for faster charging of the device batteries

The optional charging station allows the PCAN-Diag FD to be charged more quickly. This reduces the time required to fully charge the device batteries from approximately 4 to 2 hours. In addition, the PCAN-Diag FD can be placed on the table in the charging station to save space. The device remains operational.

Note: The charging station is supplied without an additional power supply unit, as the existing power supply unit of the PCAN-Diag FD is used.

Specifications

- Plastic stand suitable for the PCAN-Diag FD
- Connects the power supply for fast charging of the PCAN-Diag FD
- Connection of the PCAN-Diag FD power supply unit (12 V) to the socket on the back of the charging station
