

FEATURES

- Safely removes flux from PCB's
- This RS PRO isopropyl alcohol cleaning and degreasing solution is an ideal alternative to CFC-based solvents
- Completely miscible with water for easy dilution if required
- The non-aggressive cleaner is ideal for cleaning sensitive electronics,

RS PRO 1 L Bottle Isopropyl Alcohol (IPA) for Electronic Components, PCBs

RS Stock No.: 187-6955

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

Introducing the RS PRO bulk pack of Isopropyl Alcohol (IPA), which is a fast-drying, but flammable liquid used for cleaning and degreasing in many industrial and pharmaceutical processes and applications. It leaves no residue when cleaning and gives off a slight odour in order to assist in monitoring over-exposure in poorly ventilated areas for health reasons. This RS PRO IPA liquid is a highly effective, general-purpose solvent that is used as a cleaning solution for removing dirt, oil and grease from different materials and components, like fragile and sensitive electronics, PCBs (Printed Circuit Boards) or other peripherals.

General Specifications

Package Size	1L
Package Type	Bottle
Product Category	Solvent
Appearance	Clear, Colourless Liquid
Miscibility In Water	Complete
Applications	cleaning and removing grease, oil, dust or flux from delicate electronic assemblies

Mechanical Specifications

Density At 20°C	0.79g/ml
Purity	99.7%
Water Content	0.15%
Residue On Evaporation (ppm)	0.002g/100ml max
Flammability	Flammable

Operation Environment Specifications

Boiling Point	82°C
Flash Point	12°C

Approvals

Compliance/Certifications

RoHS Certificate of Compliance
