

Endress+Hauser Transmitter CM14-AAM

Compact panel transmitter for a pH/ORP, conductivity or dissolved oxygen measuring point.

Picture for reference only. Product appearance may vary based on configuration

The Liquiline CM14 is a 1-channel transmitter suitable for operating a standard measuring point in the food, power, water and wastewater industries. The compact device fits in the common cabinet cut-outs. The Memosens hot plug and play concept allows quick installation and configuration of digital conductivity, pH/ORP or dissolved oxygen sensors.

- Simple commissioning and operation thanks to Memosens digital technology
- Compact device in 48 x 96 mm panel-mounted housing - ideal for skid installations

Configuration of CM14-AAM:

Approval:	AA	Non-hazardous area
Sensor Input:	M	Digital,Memosens pH, ORP (glass)

Alternative part number: CM14-1020/0
