## LEDLENSER MT14 LED Torch (Rechargeable)

The rechargeable Ledlenser MT14 torch is the outstanding choice for lighting outdoor adventures. Beaming out an incredible 1000 lumens, the MT14 is configured to optimise run time delivering nine hours on full power and an unbelievable eight days on its lowest 10 lumen setting. This enables users to enjoy their adventures and passions for longer. Developed in conjunction with, and extensively put through its paces by Ledlenser's PRO-Team of Outdoor Ambassadors, the MT14 features Power, Mid Power and Low Power light outputs that can easily be selected via the integrated Smart Light Technology. The patented Advanced Focus System optics and Speed Focus combination that Ledlenser are renowned for then bundle this light seamlessly into a flood beam, a spot beam or anywhere in-between the two. The front switch is perfectly positioned to be easy to use even with gloves on. Handily, it also acts as a dual battery indicator showing the amount of battery charge left when in use, and the charged-up level of the battery whilst recharging. Recharging couldn't be easier. The very latest USB 3.0 cable provided will charge the torch up to 80% capacity in just four hours if time is critical. A transport lock feature to stop accidental battery drain ensures light is available when needed. Supplied with a rechargeable L-ion (26650) 3.7V battery, USB 3.0 recharging cable, pouch and wrist-strap. Rated IPX4 water resistant.

As a leading international brand of hand-held torches and head lamps, Ledlenser is renowned for superior precision German engineering, outstanding performances, and state-of-the art technologies. With a reputation for reliability that is second to none, Ledlenser lights are backedup with their industry-leading 7 year with registration warranty.

- · Rechargeable 1000 lumens max handheld torch configured to provide exceptional run times
- Nine hours run time on full power and incredible 8 days on 10 lumen setting
- Patented Advanced Focus System optics for flood beam (near illumination), spot beam (distance illumination) or anywhere in-between
- Speed Focus. Speedy single-handed focussing of the Advanced Focus System optics allowing free use of other hand
- Smart Light Technology three mode light selection
  - Mode 1 Power, Mid Power, Low Power
  - Mode 2 Low Power, Mid Power, Power
  - Mode 3 Power, Mid Power, Low Power, instant-on Emergency Strobe
- Multi-function front switch that also acts as a dual battery indicator
  - Shows battery charge left when torch in use

Power

- · Shows charged-up level when recharging
- Speed charging via supplied USB. 80% after 4 hours, 100% after 8 hours
- Transport lock to prevent accidental battery drain
- Suited to extreme hot and cold climates
- Water resistance rated IPX4

**Technical Specification** 

- Precision German engineered backed-up with a 7-year with registration warranty
- Supplied with L-ion (26650) 3.7V battery, USB 3.0 recharging cable, pouch and wrist-strap
