

Standard-Fastening Set 8, bright zinc-plated

Standard-Fastening Set 8, bright zinc-plated from item joins two Line 8 profiles at a right angle to create a connection that is highly resistant to displacement and torsion. The connecting plate is made of bright zinc-plated steel and projects into the grooves on both sides to ensure the alignment of the profiles is torsion-resistant. A thread needs to be tapped into the core bore of the first profile to install the fastener. The second profile requires an installation bore and is connected in a fixed position.

Scope of Delivery
