

MIC50-17-14-A

Ruland MIC50-17-14-A, 17mm x 17mm Single Beam Coupling, Aluminum, Clamp Style, 1.969" (50.0mm) OD, 2.126" (54.0mm) Length

Description

Ruland MIC50-17-14-A is a single beam coupling with 17mm x 14mm, 1.969" (50.0mm) OD, and 2.126" (54.0mm) length. It is machined from a single piece of material and feature one long continuous spiral cut. This gives it higher misalignment capabilities than comparably sized multiple beam couplings. MIC50-17-14-A is zero-backlash making it well suited for applications such as encoders that require high positioning accuracy. MIC-series couplings have purely metric outer diameter and length dimensions and fit in a smaller envelope than the ICR-series. All hardware is metric and tests beyond DIN 912 12.9 standards for maximum torque capabilities. MIC50-17-14-A is made from 7075 aluminum for lightweight and low inertia. It is machined from bar stock that is sourced exclusively from North American mills and RoHS3, REACH, and Conflict Minerals compliant. MIC50-17-14-A is manufactured in our Marlborough, MA factory under strict controls using proprietary processes.

- Note 1** Torque ratings are at maximum misalignment.
- Note 2** Performance ratings are for guidance only. The user must determine suitability for a particular application.
- Note 3** Torque ratings for the couplings are based on the physical limitations/failure point of the machined beams. Under normal/typical conditions the hubs are capable of holding up to the rated torque of the machined beams. In some cases especially when the smallest standard bores are used or where shafts are undersized slippage on the shaft is possible below the rated torque of the machined beams.
