

## CONTACTLESS HYDROALCOHOLIC GEL DISPENSER

00119013

0011914

00119115

- **Stability:** with a small base space requirement
- **Economical:** dispenses the right dose
- **Safety:** the hydroalcoholic gel is accessible with a key
- **Hygienic:** no contact with hands and arms

This hand disinfection station works with hydroalcoholic gel.

It simply works with an infrared detector that allows it to deliver the right dose of hydroalcoholic gel when a hand is detected.

### Features

#### Structure:

- Primary corrosion resistant steel
- Powder-coated UV-resistant steel
- Neutral nameplate (customizable)
- Colours: white, green and grey

#### Dimensions:

- Overall LxWxH: 380x380x1630 mm
- Tube width: 30 mm
- Handle height: 1127 mm
- Nameplate width 230 mm

#### Gel dispenser

- White ABS with antistatic additive
- Capacity: 0.85 L
- Adjustable flow rate: 0.5-2.5 ml
- Type of detection: non-contact infrared
- Locking by key lock
- Power supply 4 LR6 batteries (not included)
- Compatible with hydroalcoholic gels (except microbeads)
