Product Description

ESD KEYBOARD SHELF

ESD keyboard shelf for ESD modular tables is a practical and comfortable solution that perfectly fits modern workstations. Positioned just beneath the desktop, this shelf provides an ergonomic placement for the keyboard, allowing users to use it naturally and comfortably. This helps reduce muscle tension and the risk of ailments associated with prolonged computer use.

The under-desk shelf allows for efficient workspace management. The keyboard is within easy reach, and the desktop remains free of unnecessary items, which contributes to better organization and tidiness at the workstation. This solution not only enhances user comfort but also supports ergonomic workstation setup.

The shelf is made from 1.0 mm thick sheet metal and can support a load of up to 25 kg, ensuring durability and stability. Full-extension slides enable easy and smooth extension and retraction of the shelf, and the standard dimensions of 750 x 350 mm can be adjusted to individual needs. It is an excellent choice for anyone who values comfort and efficiency in their workspace.

Accessories compatible with L & H Type workbenches 1200/1500/1800/2000
