

T-LOK Tamperproof Faceplate

T-LOK Tamperproof Faceplate (KPJ2NT)

This tamperproof faceplate provides an economical way for controlling physical access to a network in shared working environments. It substantially improves security of connections in educational, healthcare and the financial services industries. This competitively priced product is ideal for mission critical networks that require a secure solution in public places, or third party installation sites.

Features

- UK designed and manufactured
- Aesthetically pleasing appearance
