BiCD Integrated Circuit Silicon Monolithic

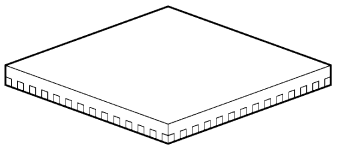
TB62214AFTG

BiCD Constant-Current Two-Phase Bipolar Stepping Motor Driver IC

The TB62214AFTG is a two-phase bipolar stepping motor driver using a PWM chopper controlled by clock input.

Fabricated with the BiCD process, the TB62214AFTG is rated at 40 V/2.0 A .

The on-chip voltage regulator allows control of a stepping motor with a single VM power supply.



QFN48-P-0707-0.50A

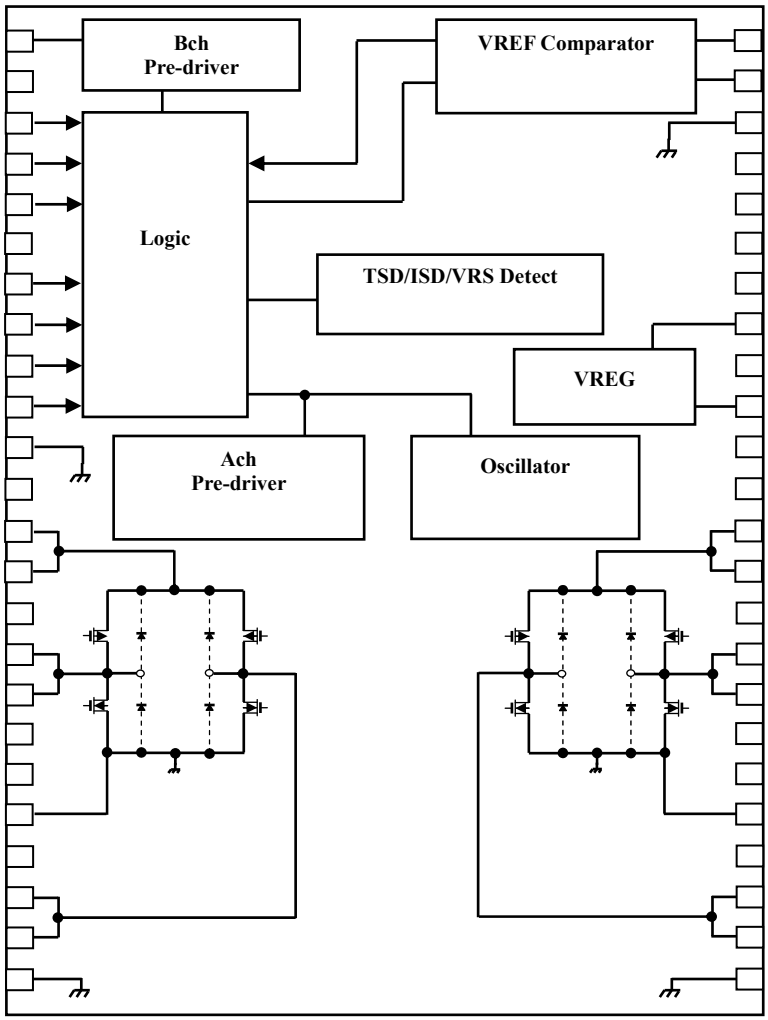
Weight : 0.14 g (typ.)

Features

- Bipolar stepping motor driver
- PWM constant-current drive
- Clock input control
- Allows two-phase, 1-2-phase and W1-2-phase excitations.
- BiCD process: Uses DMOS FETs as output power transistors.
- High voltage and current: 40 V/2.0 A (absolute maximum ratings)
- Thermal shutdown (TSD), overcurrent shutdown (ISD), and power-on-resets (PORs)
- Packages: QFN48-P-0707-0.50A

Do not design your products or systems based on the information on this document.
Please contact your Toshiba sales representative for updated information before designing your products.

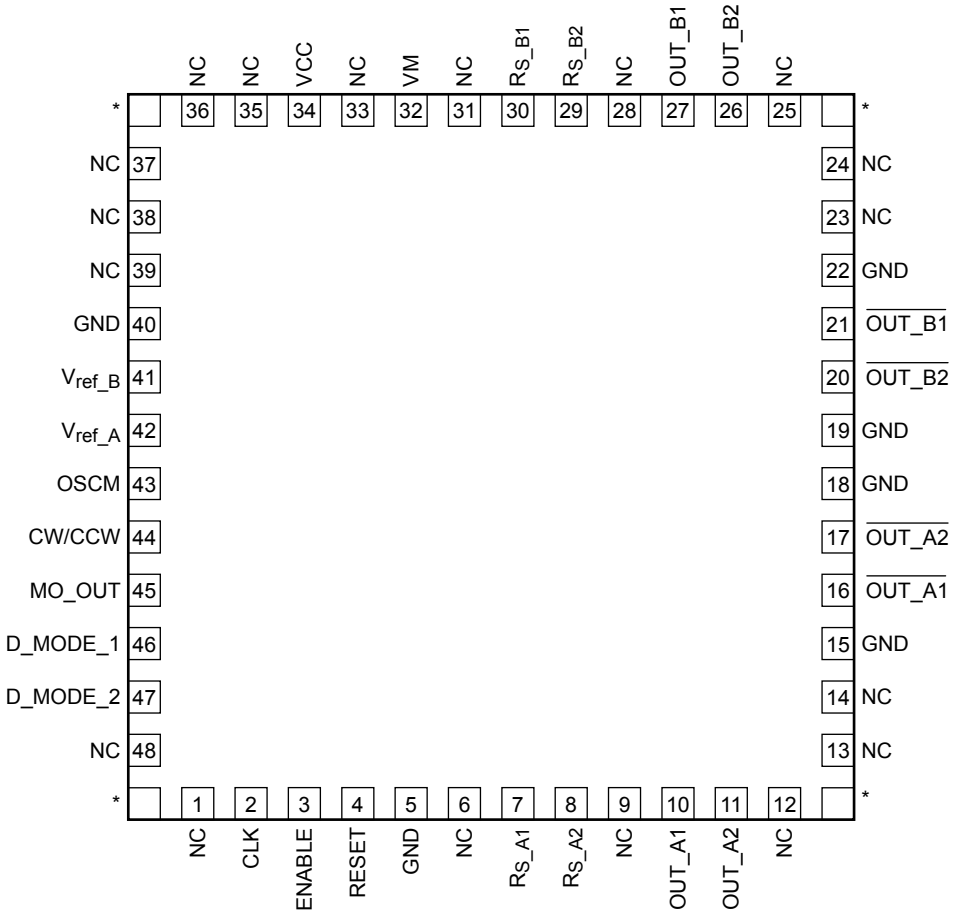
Block Diagram



Functional blocks/circuits/constants in the block chart etc. may be omitted or simplified for explanatory purposes.

Pin Assignment

TB62214AFTG



Pin Function

Pin No.	Pin Name	Function	Pin No.	Pin Name	Function
1	NC	No-connect	25	NC	No-connect
2	CLK	An electrical angle leads on the rising edge of the clock input. A motor rotation count depends on the input frequency.	26	OUT_B2	B-phase positive driver output
3	ENABLE	A-/B-channel output enable	27	OUT_B1	
4	RESET	Electric angle reset	28	NC	No-connect
5	GND	Logic ground	29	R_{S_B2}	Power supply of B-phase motor coil and the sink current sensing of B-phase motor coil
6	NC	No-connect	30	R_{S_B1}	
7	R_{S_A1}	Power supply of A-phase motor coil and the sink current sensing of A-phase motor coil	31	NC	No-connect
8	R_{S_A2}		32	VM	Power supply
9	NC	No-connect	33	NC	No-connect
10	OUT_A1	A-phase positive driver output	34	VCC	Smoothing filter for logic power supply
11	OUT_A2		35	NC	No-connect
12	NC	No-connect	36	NC	No-connect
13	NC	No-connect	37	NC	No-connect
14	NC	No-connect	38	NC	No-connect
15	GND	Motor power ground	39	NC	No-connect
16	$\overline{OUT\_A1}$	A-phase negative driver output	40	GND	Logic ground
17	$\overline{OUT\_A2}$		41	V_{ref_B}	Tunes the current level for B-phase motor drive.
18	GND	Motor power ground	42	V_{ref_A}	Tunes the current level for A-phase motor drive.
19	GND	Motor power ground	43	OSCM	Oscillator pin for PWM chopper
20	$\overline{OUT\_B2}$	B-phase negative driver output	44	CW/CCW	Motor rotation: forward/reverse
21	$\overline{OUT\_B1}$		45	MO_OUT	Electric angle monitor
22	GND	Motor power ground	46	D_MODE_1	Excitation mode control
23	NC	No-connect	47	D_MODE_2	Excitation mode control
24	NC	No-connect	48	NC	No-connect

CLK Function

CLK Input	Function
Rise	The electrical angle leads by one on the rising edge.
Fall	Remains at the same position.

ENABLE Function

ENABLE Input	Function
H	Output transistors are enabled (normal operation mode).
L	Output transistors are disabled (high impedance state).

CW/CCW Function

CW/CCW Input	Function
H	Forward (CW)
L	Reverse (CCW)

Excitation Mode Select Function

D_MODE_1	D_MODE_2	Function
L	L	OSC_M, output transistors are disabled (in Standby mode)
L	H	Two-phase excitation
H	L	1-2-phase excitation
H	H	W1-2-phase excitation

RESET Function

RESET Input	Function
L	Normal operation mode
H	The electrical angle is reset.

Excitation Mode	A-phase Current	B-phase Current
2 Phase	100%	100%
1 – 2 Phase	100%	100%
W1-2 Phase	71%	71%

Absolute Maximum Ratings (Ta = 25°C)

Characteristics	Symbol	Rating	Unit
Motor power supply	VM	40	V
Motor output voltage	V_{OUT}	40	V
Motor output current	I_{OUT}	2.0	A
Digital input voltage	V_{IN}	-0.5 to 6.0	V
Vref standard voltage	V_{ref}	5.0	V
MO output voltage	VM_O	6.0	V
MO output sink current	I_{MO}	30.0	mA
Power dissipation	P_D	1.15	W
Operating temperature	T_{opr}	−20 to 85	°C
Storage temperature	T_{stg}	−55 to 150	°C
Junction temperature	$T_{j\ (MAX)}$	150	°C

Operating Ranges (Ta=0 to 85°C)

Characteristics	Symbol	Min	Typ.	Max	Unit
Motor power supply	VM	10.0	24.0	38.0	V
Motor output current	I_{OUT}	–	1.4	2.0	A
Digital input voltage	$V_{IN\ (H)}$	2.0	–	5.5	V
	$V_{IN\ (L)}$	-0.4	–	1.0	V
MO output voltage	VM_O	–	3.3	5.5	V
Clock input frequency	f_{CLK}	–	–	100	kHz
Chopper frequency	f_{chop}	40.0	100.0	150	kHz
V_{ref} reference voltage	V_{ref}	GND	–	3.6	V
Voltage across the current-sensing resistor pins	V_{RS}	0.0	±1.0	±1.5	V

Electrical Characteristics (Ta = 25°C, VM= 24 V, unless otherwise specified)

Characteristics		Symbol	Test Circuit	Test Condition	Min	Typ.	Max	Unit
Input hysteresis voltage		$V_{IN\ (HIS)}$	DC	Digital input pins	100	200	300	mV
Digital input current	High	$I_{IN\ (H)}$	DC	V_{IN} = 5 V at the digital input pins under test	35	50	75	μA
	Low	$I_{IN\ (L)}$	DC	V_{IN} = 0 V at the digital input pins under test	–	–	1	μA
MO output voltage	High	$V_{OH\ (MO)}$	–	I_{OH} = -24 mA when the output is High	2.4	–	–	V
	Low	$V_{OL\ (MO)}$	–	I_{OL} = 24 mA when the output is Low	–	–	0.5	V
Supply current		I_{M1}	DC	Outputs open, In standby mode	–	2	3	mA
		I_{M2}	DC	Outputs open, ENABLE = Low	–	3.5	5	mA
		I_{M3}	DC	Outputs open (two-phase excitation)	–	5	7	mA
Output leakage current	High-side	I_{OH}	DC	V_{RS} = VM = 40 V, V_{OUT} = 0 V	–	–	1	μA
	Low-side	I_{OL}	DC	V_{RS} = VM = V_{OUT} = 40 V	1	–	–	μA
Channel-to-channel differential		ΔI_{OUT1}	DC	Channel-to-channel error	–5	0	5	%
Output current error relative to the predetermined value		ΔI_{OUT2}	DC	I_{OUT} = 1 A	–5	0	5	%
R_S pin current		I_{RS}	DC	V_{RS} = VM = 24 V	0	–	10	μA
Drain-source ON-resistance of the output transistors (upper and lower sum)		$R_{ON\ (D-S)}$	DC	I_{OUT} = 2.0 A, T_j = 25°C	–	1.0	1.5	Ω

IC Usage Considerations

Notes on handling of ICs

(1) The absolute maximum ratings of a semiconductor device are a set of ratings that must not be exceeded, even for a moment. Do not exceed any of these ratings.
Exceeding the rating(s) may cause the device breakdown, damage or deterioration, and may result injury by explosion or combustion.

(2) Use an appropriate power supply fuse to ensure that a large current does not continuously flow in case of over current and/or IC failure. The IC will fully break down when used under conditions that exceed its absolute maximum ratings, when the wiring is routed improperly or when an abnormal pulse noise occurs from the wiring or load, causing a large current to continuously flow and the breakdown can lead smoke or ignition. To minimize the effects of the flow of a large current in case of breakdown, appropriate settings, such as fuse capacity, fusing time and insertion circuit location, are required.

(3) If your design includes an inductive load such as a motor coil, incorporate a protection circuit into the design to prevent device malfunction or breakdown caused by the current resulting from the inrush current at power ON or the negative current resulting from the back electromotive force at power OFF. IC breakdown may cause injury, smoke or ignition.
Use a stable power supply with ICs with built-in protection functions. If the power supply is unstable, the protection function may not operate, causing IC breakdown. IC breakdown may cause injury, smoke or ignition.

(4) Do not insert devices incorrectly or in the wrong orientation.
Make sure that the positive and negative terminals of power supplies are connected properly. Otherwise, the current or power consumption may exceed the absolute maximum rating, and exceeding the rating(s) may cause breakdown, damage or deterioration of the device, and may result in injury by explosion or combustion.
In addition, do not use any device that has had current applied to it while inserted incorrectly or in the wrong orientation even once.

(5) Carefully select power amp, regulator, or other external components (such as inputs and negative feedback capacitors) and load components (such as speakers).
If there is a large amount of leakage current such as input or negative feedback capacitors, the IC output DC voltage will increase. If this output voltage is connected to a speaker with low input withstand voltage, overcurrent or IC failure can cause smoke or ignition. (The over current can cause smoke or ignition from the IC itself.) In particular, please pay attention when using a Bridge Tied Load (BTL) connection type IC that inputs output DC voltage to a speaker directly.

RESTRICTIONS ON PRODUCT USE

- Toshiba Corporation, and its subsidiaries and affiliates (collectively "TOSHIBA"), reserve the right to make changes to the information in this document, and related hardware, software and systems (collectively "Product") without notice.
- This document and any information herein may not be reproduced without prior written permission from TOSHIBA. Even with TOSHIBA's written permission, reproduction is permissible only if reproduction is without alteration/omission.
- Though TOSHIBA works continually to improve Product's quality and reliability, Product can malfunction or fail. Customers are responsible for complying with safety standards and for providing adequate designs and safeguards for their hardware, software and systems which minimize risk and avoid situations in which a malfunction or failure of Product could cause loss of human life, bodily injury or damage to property, including data loss or corruption. Before customers use the Product, create designs including the Product, or incorporate the Product into their own applications, customers must also refer to and comply with (a) the latest versions of all relevant TOSHIBA information, including without limitation, this document, the specifications, the data sheets and application notes for Product and the precautions and conditions set forth in the "TOSHIBA Semiconductor Reliability Handbook" and (b) the instructions for the application with which the Product will be used with or for. Customers are solely responsible for all aspects of their own product design or applications, including but not limited to (a) determining the appropriateness of the use of this Product in such design or applications; (b) evaluating and determining the applicability of any information contained in this document, or in charts, diagrams, programs, algorithms, sample application circuits, or any other referenced documents; and (c) validating all operating parameters for such designs and applications. **TOSHIBA ASSUMES NO LIABILITY FOR CUSTOMERS' PRODUCT DESIGN OR APPLICATIONS.**
- **PRODUCT IS NEITHER INTENDED NOR WARRANTED FOR USE IN EQUIPMENTS OR SYSTEMS THAT REQUIRE EXTRAORDINARILY HIGH LEVELS OF QUALITY AND/OR RELIABILITY, AND/OR A MALFUNCTION OR FAILURE OF WHICH MAY CAUSE LOSS OF HUMAN LIFE, BODILY INJURY, SERIOUS PROPERTY DAMAGE AND/OR SERIOUS PUBLIC IMPACT ("UNINTENDED USE").** Except for specific applications as expressly stated in this document, Unintended Use includes, without limitation, equipment used in nuclear facilities, equipment used in the aerospace industry, medical equipment, equipment used for automobiles, trains, ships and other transportation, traffic signaling equipment, equipment used to control combustions or explosions, safety devices, elevators and escalators, devices related to electric power, and equipment used in finance-related fields. **IF YOU USE PRODUCT FOR UNINTENDED USE, TOSHIBA ASSUMES NO LIABILITY FOR PRODUCT.** For details, please contact your TOSHIBA sales representative.
- Do not disassemble, analyze, reverse-engineer, alter, modify, translate or copy Product, whether in whole or in part.
- Product shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable laws or regulations.
- The information contained herein is presented only as guidance for Product use. No responsibility is assumed by TOSHIBA for any infringement of patents or any other intellectual property rights of third parties that may result from the use of Product. No license to any intellectual property right is granted by this document, whether express or implied, by estoppel or otherwise.
- **ABSENT A WRITTEN SIGNED AGREEMENT, EXCEPT AS PROVIDED IN THE RELEVANT TERMS AND CONDITIONS OF SALE FOR PRODUCT, AND TO THE MAXIMUM EXTENT ALLOWABLE BY LAW, TOSHIBA (1) ASSUMES NO LIABILITY WHATSOEVER, INCLUDING WITHOUT LIMITATION, INDIRECT, CONSEQUENTIAL, SPECIAL, OR INCIDENTAL DAMAGES OR LOSS, INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS, LOSS OF OPPORTUNITIES, BUSINESS INTERRUPTION AND LOSS OF DATA, AND (2) DISCLAIMS ANY AND ALL EXPRESS OR IMPLIED WARRANTIES AND CONDITIONS RELATED TO SALE, USE OF PRODUCT, OR INFORMATION, INCLUDING WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, ACCURACY OF INFORMATION, OR NONINFRINGEMENT.**
- Do not use or otherwise make available Product or related software or technology for any military purposes, including without limitation, for the design, development, use, stockpiling or manufacturing of nuclear, chemical, or biological weapons or missile technology products (mass destruction weapons). Product and related software and technology may be controlled under the applicable export laws and regulations including, without limitation, the Japanese Foreign Exchange and Foreign Trade Law and the U.S. Export Administration Regulations. Export and re-export of Product or related software or technology are strictly prohibited except in compliance with all applicable export laws and regulations.
- Please contact your TOSHIBA sales representative for details as to environmental matters such as the RoHS compatibility of Product. Please use Product in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. **TOSHIBA ASSUMES NO LIABILITY FOR DAMAGES OR LOSSES OCCURRING AS A RESULT OF NONCOMPLIANCE WITH APPLICABLE LAWS AND REGULATIONS.**
