

ROLLING TOOL BOX

TB-B1-B-70R

The ToughBuilt® StackTech® Rolling Tool Box forms the perfect cornerstone for Pros to build a system unlike any other and customise it to the needs of every trade.

The StackTech Rolling Tool Box is the mobile foundation of the system. It features an intuitive self-aligning top that allows StackTech boxes and totes to virtually stack themselves on the Rolling Tool Box. Accessing tools is simple and intuitive with a one-handed center latch, standard to every size tool box and organiser. Inside, you'll find an internal tray to help Pros stay organised and partition their space. The telescoping rear handle detaches rapidly to fit the StackTech Rolling Tool Box under the cover of your truck bed. Full customisation is at Pros fingertips with tool-free, quick-release steel accessory rails. StackTech Rolling Tool Box is built for high-impact durability with armored corners, a steel-reinforced lid, and IP65 dust and water protection to ensure it can handle the toughest conditions. Dual locking points secure tools in the truck or on the jobsite, and robust 22cm all-terrain wheels tackle any environment on the go.
