MULTI-POINT

The self levelling - 5 beam **Product advantages** laser pointer

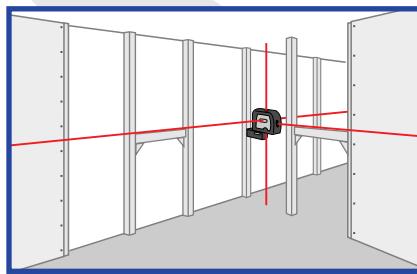

Ideal for dry lining and interior conversions, this innovative self levelling laser unit simultaneously transmits five laser beams angled at 90° to each other, making easy work of such jobs as the setting out of studwork and uprights, and installing partitioning. An indicator shows when the unit is outside the levelling range.

Typical uses

Interior construction
Dry wall building

- **Displays 5 laser points**, with right-angled (90°) laser beams, showing horizontal, vertical and side (cross) reference points simultaneously.
- **Self-levelling** within $\pm 4^\circ$ (side elevation) and $\pm 10^\circ$ (front/back).
- **Laser diode** 635 nm wavelength, class 2/DIN-EN 60825-1.
- **Maximum measuring tolerance** (laser): 0.4 mm/m.
- **Exit performance** $^{\circ}1$ mW.
- **Application range** approx. 30 m (radius).
- **Indicator** for out-of-range warning.
- **Dust and splash resistant** shatter-proof easy grip plastic and rubber case.
- **Magnetised swivel foot** with $+360^\circ$ rotational capability and belt attachment for horizontal and vertical fixing and twin screw holes for wall mounting

- **Light weight** 1.3kg with case, 400gms excluding case.
- **Ultra compact unit** approximate dimensions 10.5 x 11.5 x 3.8 cm.
- **Ribbed on-off switch** for ease of use.
- **Battery compartment lock**.
- **Tripod thread** 1/4" x 20"
- **Operation time** approx. 20 hrs. Auto-off (15 mins); without auto-off, 8 hrs continuous use.

Accessories included

- 3 x 1.5 V AA-batteries (LR6)
- Shatter-proof plastic carry case
- Auxiliary adaptor for tripod 5/8"
- Laser target

Additional accessories

- Builders tripod
- Magnetic target plate
- Laser goggles
- Laser beam detector
