Handheld PC

Convenient and Light. HP Jornada Takes You Further.

As an accomplished professional, you know the daily demands you face like no one else. You're on the move, juggling details all day long. Don't you deserve the best PC companion you can find? Hewlett-Packard, the company that brought you the breakthrough HP 300 and 600 series palmtop PCs, introduces the first of a new generation of handheld PCs. The **HP Jornada 820 Handheld PC** is a portable **e-mail** companion that gives you fast and convenient mobile communications *everywhere your business takes you*.

Ready to Work When You Are

HP Jornada manages its power so efficiently you can use it for **up to 10 hours¹** without recharging or plugging it in. And the optional extended battery pack—the same size as the standard pack—gives you up to 15 hours¹ of continuous battery life. You won't be kept waiting, either, because the **instant-on** StrongARM processor powers up immediately, giving you information access on the spot.

Unparalleled Convenience . . .

. . . When you're on the road

Practically feather-light, HP Jornada weighs only **2.5 pounds (1.1 kg)**, so it fits easily in your briefcase or handbag. Its special dialup software, with an **internal 56Kbps modem²**, connects you easily into e-mail and the Web, and the **HP Jornada viewer** allows quick access to your personal information. Use any phone line to synchronize with your desktop PC back at the office. For added peace of mind, you can use HP Jornada's power-on **password protection** with a time delay feature you can set to your preference, and the **backup/restore capability** to ensure your data is always safe.

. . . When you're in meetings or giving presentations

HP Jornada powers up quickly and quietly, so you're never distracting or conspicuous in meetings. When you open it up, you'll find the wide color screen, integrated touch pad, and touch-typeable keyboard completely comfortable and convenient for taking notes and accessing information. You can also use the **built-in VGA-Out port** and **HP Jornada show application** to connect to any standard VGA monitor or projector.

. . . When you're back in the office

The convenience doesn't stop once you're back at your desk. As soon as it's connected to the sync cable and AC adapter, HP Jornada automatically recharges itself and synchronizes your e-mail, documents, and personal information with your desktop PC—so it's ready to go when you are.

¹ Estimated battery life. Actual battery life will vary based on usage.

² Model with internal modem may not be available in some countries. Please check with your reseller for details.

- Access e-mail and key information with unparalleled convenience
- Work up to 10 hours¹ without recharging
- Carry all your critical data in this lightweight, 2.5-pound (1.1-kg) companion!
- Enjoy the familiarity of Windows with the latest Microsoft® Windows® CE, Handheld PC Professional Edition software

Affordable, Reliable, and Easy to Maintain

You can feel right at home with **Microsoft Windows CE, Handheld PC Professional Edition software**, which provides the Windows 95/98/NT® look and feel you're accustomed to, plus familiar pocket versions of Microsoft Office, Internet Explorer, and Outlook—all *preloaded* so you don't have to buy additional software. Add **DMI-compliant manageability** and a durable design—and you have a portable, reliable, *affordable* communications companion that's ready to help you go the distance.

HP Jornada Handheld PC

Where can you find PC communications power that's completely portable, lightweight, and affordable? From the industry leader, Hewlett-Packard, with the new HP Jornada 820 Handheld PC. All the resources you need to stay in touch when you're away from your desk are combined in one compact handheld PC from HP—the HP Jornada for fast and convenient mobile communications.
