

Dremel MAX SpeedClic Sanding Discs 60 Grit 3pack (SC411DM)

Accessory

Sanding

20X Longer life, 3-piece sanding discs set.

- 3-piece set of 60 grit sanding discs.
- Suitable for use on various materials from wood to metal.
- 20X longer lifespan compared to Dremel SC411.
- EZ SpeedClic for fast and easy accessory changes.

What can you do with it?

Meet the SC411DM – it's a game-changer with a remarkable 20X longer lifespan compared to Dremel SC411, taking your crafting to new heights. This set includes three 60 grit sanding discs, perfect for shaping and smoothing a variety of materials. Thanks to its durable abrasive, the accessory lasts longer, and the polyester cloth backing pad adds strength. With a 38mm diameter and a sturdy metal support, these discs are built to last. Plus, they work seamlessly with the EZ Lock system for quick and easy accessory changes. And, thanks to the patented EZ SpeedClic™ mandrel design, changing accessories is a breeze, happening 6X faster.

How to use?

To use these discs, pair them with the SC402 Mandrel. Dremel's exclusive Easy SpeedClic (SC) system simplifies wheel changes – just PULL, TWIST, and RELEASE. It's 6X faster than a standard mandrel (EZ SpeedClic mandrel SC402 available separately). When using these discs, ensure your Dremel tool faces the workpiece. They're flexible, so they adapt to project curves. For the best results, focus on the disc's center.

Materials to use on

Suitable for use on wood, wood-like materials, plastic, metals, drywall, soft stone and shell.

Recommended speed

Wood: 15.000 – 20.000 RPM Plastic: 15.000 – 25.000 RPM Metal: 15.000 – 25.000 RPM Soft Stone & Shell – 15.000 – 25.000 RPM Drywall – 15.000 – 20.000 RPM
