

2100 SERIES THERMOMETERS

Waterproof / Industry standard connector / Extended Probe Range / 2 Year Warranty / Calibration Certificate included

Instruments

Setting new standards in measurement

TEMPERATURE

2100 SERIES OF HAND-HELD CONTACT THERMOMETERS

Building on the success of the 2000 range, this new generation marks an evolutionary step in the development of Digitron's digital thermometers and probes.

The 2106 and 2146 which are now waterproof as standard incorporate the Food Industry standard Lumberg connector for Thermistor and Thermocouple probes.

An extended selection of probes with Lumberg plugs for Digitron and Competitor instruments are now available to complement the 2100 series thermometers.

Common specification

Key Features

- Simple to operate
- Waterproof case
- 'T' type and Thermistor options
- 2 year warranty
- Calibration certificate included *
- Long battery life - typically 500 hours
