

## Lenovo DisplayPort to DisplayPort cable

### Overview:

DisplayPort is a next-generation technology that delivers high bandwidth, pure digital audio video signals from your PC to your display. Lenovo DisplayPort to DisplayPort Cable conforms to DisplayPort 1.2 specification, and offers a royalty free full digital audio video support in the same cable. Supporting a maximum bandwidth of 21.6 Gbps, Lenovo DisplayPort to DisplayPort Cable enables support for next generation multimedia applications with superior fidelity and 3D support, higher resolution of up to 4K x 2K displays and daisy chaining and multiple monitor support over a single connector.

### Key Details:

- Supporting a maximum bandwidth of 21.6 Gbps
- Daisy chain support
- Resolution supports 4k up to 2 displays
- Length: 1.8m (70.8in)
- Weight: 0.2 kg (0.53 lb)

DisplayPort specifies an open digital communications interface between:

- PC and monitor
- PC and TV
- Device, such as DVD player, and TV display
