

# **Complementary note to the procedure of the recall of Legris standard blowguns with elbow. Part numbers 0659 00 13 and 0659 00 14**

Within the framework of the recall of Legris standard blowguns for safety reasons, we would like to clarify the following point with our customers.

The blowguns proposed by Legris to replace the potentially defective products were submitted to specific controls guaranteeing their performance.

Some of these products of replacement could have a manufacturing date identical to blowguns at risk, that means situated between March 2006 and December 2006.

In order to identify them, a complementary marking (« 1 » or « 2 ») on the level of brass insert has been added and guarantees the conformity of the delivered product.

The product with this marking "1" or "2" are not concerned by the recall procedure.

**Blow gun conformity  
guaranteed by the marking  
« 1 » or « 2 »**
