

2-SHELF SYSTEM | TB-B1S3-M-20

The ToughBuilt® StackTech® 2-Shelf System provides a convenient way to store StackTech tool boxes in the workshop or work trailer/van.

The StackTech 2-Shelf System includes two robust shelves, supported by sturdy metal brackets, and two 50cm standard E-Track rails that can be securely anchored to walls or other surfaces. The E-Track system allows adjusting shelf heights by moving the shelves along the E-Track rails, giving you the freedom to organise your space exactly the way you need it. Each shelf has a generous 22 kg weight capacity and built-in tie-down points to securely anchor straps. Increase your efficiency and productivity by adding the StackTech Two-Shelf System to your garage or work trailer/van setup for convenient off-the-floor storage of StackTech tool boxes.

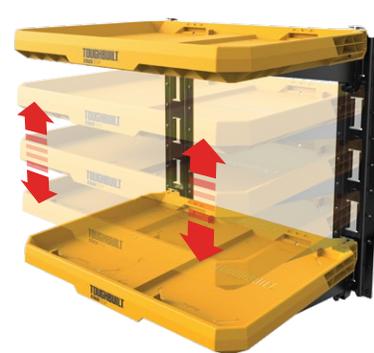

22.5 KG PER SHELF
