RS Pro Plastic Edge Off

Instructions

Do not use heavy pressure when deburring as this will cause the blade to dig into the material and give an uneven finish
Use light and even pressure which will allow the blade and handle to work together to remove the burr and leave a smooth finish on the component

Blades should be handled carefully as they are sharp and can cut
Blades can break causing flying objects
Sharp edges and flying objects can cause injury
Users and bystanders should wear protective safety glasses
Do not pry or bend blades
Keep blades and sharp tools away from children
Do not regrind blades as this will weaken the blade and cause breakage and possible injury

S10 Heavy Duty Deburring Blade
