LIFETIME WORLD MAPS

Install and update maps from around the world at no extra cost, for the lifetime of your device.

*Based on more than 300 trips covering Paris (BenchExpert, December 2014), Berlin (NavCert, December 2014) and London (Blauw, January 2015), comparing TomTom and Garmin real-time traffic-enabled portable navigation devices during morning & evening peak commuting times.

**Your smartphone needs to be compatible and come with a data plan. Extra costs may apply, check tomtom.com/connect for more information. On average, if you drive for one hour per day during peak time traffic, you will use approximately 7 MB of data per month. This is less than downloading 2 music tracks per month (which use around 5MB each).

WHAT DOES LIFETIME MEAN?

Lifetime is the useful life of the device, which means the period of time that TomTom continues to support your device with software updates, services, content or accessories. A device will have reached the end of its life when none of these are available any more.

Lifetime Services can only be used on the device they have been purchased with and cannot be transferred to another TomTom device or app.
